Subject Index of Volume 167

Abrasion resistance
abrasion and erosion resistance of permanent moulded austempered ductile iron, 1
Acoustic modelling
description of the rolling friction process by acoustic modelling, 33
Antiscoring properties
prediction method of antiscoring properties of lubricants, 85

Brush
a study on friction and wear characteristics of substitute chromium brush plating layers under lubrication, 127

Ceramics
microscopic observations of wear of heat-resistant ceramics, 87
Chromium
a study on friction and wear characteristics of substitute chromium brush plating layers under lubrication, 127
Corrugated thrust bearing
optimization of corrugated thrust bearing characteristics, 109

Electrical brush
effect of temperature on wear rate of homopolar pulse consolidated electrical brushes, 41
Energy dissipation
fundamental mechanisms for energy dissipation at small solid sliding surfaces, 59
Erosion resistance
abrasion and erosion resistance of permanent moulded austempered ductile iron, 1

Fabric reinforcement
effect of reinforcement on friction and wear of fabric reinforced polymer composites, 93

Heat resistance
microscopic observations of wear of heat-resistant ceramics, 87
Hydrodynamic
analysis of dynamic characteristics of hydrodynamic journal bearings with isotropic roughness effects, 173

Iron
effect of sulphuric acid concentration on the rate of tribo-corrosion of iron, 101
Isotropic roughness
analysis of dynamic characteristics of hydrodynamic journal bearings with isotropic roughness effects, 173

Journal bearings
high stiffness gas journal bearing under the step force, 49
steady state performance of finite hydrodynamic porous journal bearings in turbulent regimes, 121
analysis of dynamic characteristics of hydrodynamic journal bearings with isotropic roughness effects, 173

Layers
a study on friction and wear characteristics of substitute chromium brush plating layers under lubrication, 127
Lubricants
prediction method of antiscoring properties of lubricants, 85

Machine element applications
a tribological investigation of physical vapour deposition TiN coatings paired with surface treated steels for machine element applications, 73
Misalignment
an analysis of superlaminar diaphragm thrust bearings, including misalignment and thermal effects, 133
MoS_2
stacking faults in hexagonal and rhombohedral MoS_2 crystals produced by mechanical operation in relation to lubrication, 163

Partially stabilized zirconia
friction and wear properties of partially stabilized zirconia with solid lubricant, 23
Plating
a study on friction and wear characteristics of substitute chromium brush plating layers under lubrication, 127
PMADI castings
abrasion and erosion resistance of permanent moulded austempered ductile iron, 1
Polymer composites
effect of reinforcement on friction and wear of fabric reinforced polymer composites, 93
Porous bearing
static and dynamic evaluation of permeability of porous bearing sleeves, 69
Pressure dams
stability analysis of three-lobe bearings with pressure dams, 181
PVD TiN coating
a tribological investigation of physical vapour deposition TiN coatings paired with surface treated steels for machine element applications, 73

Railway wheels
influences of skidding pattern upon the occurrences of skid damage to railway wheels, 143
Rolling friction
description of the rolling friction process by acoustic modelling, 33

Skid damage
influences of skidding pattern upon the occurrences of skid damage to railway wheels, 143
Sleeves
static and dynamic evaluation of permeability of porous bearing sleeves, 69
Sliding surfaces
fundamental mechanisms for energy dissipation at small solid sliding surfaces, 59

Solid lubricant
friction and wear properties of partially stabilized zirconia with solid lubricant, 23
Stability analysis
stability analysis of three-lobe bearings with pressure dams, 181
Stacking faults
stacking faults in hexagonal and rhombohedral MoS_2 crystals produced by mechanical operation in relation to lubrication, 163
Statistical approaches
comprehensive study of parameters for characterizing three-dimensional surface topography II: Statistical properties of parameter variation, 9
statistical approaches to surface texture classification, 155
Step force
high stiffness gas journal bearing under the step force, 49
Surface texture
statistical approaches to surface texture classification, 155
Surface topography
comprehensive study of parameters for characterizing three-dimensional surface topography II: Statistical properties of parameter variation, 9
Surface treated steels
a tribological investigation of physical vapour deposition TiN coatings paired with surface treated steels for machine element applications, 73

Thermal effects
an analysis of superlaminar diaphragm thrust bearings, including misalignment and thermal effects, 133
Three-lobe bearings
stability analysis of three-lobe bearings with pressure dams, 181
Thrust bearings
an analysis of superlaminar diaphragm thrust bearings, including misalignment and thermal effects, 133
Tribocorrosion
effect of sulphuric acid concentration on the rate of tribo-corrosion of iron, 101
Turbulence
steady state performance of finite hydrodynamic porous journal bearings in turbulent regimes, 121
